TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new Pages are occasionally added to the tariff. When a new Page is added between Pages already in effect, a decimal is added. For example, a new Page added between Pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current Page version on file with the SCPSC. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc., the most current Page number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the Page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine (9) levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1(A)
 - 2.1.1(A)(1)
 - 2.1.1(A)(1)(a)
 - 2.1.1(A)(1)(a)(I)
 - 2.1.1(A)(1)(a)(I)(i)
 - 2.1.1(A)(1)(a)(I)(i)(1)
- D. Check Sheets** - When a tariff filing is made with the SCPSC, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the Pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular Page is the most current on file with the SCPSC.

A new term plan must be signed by the Customer with new begin/end dates.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.21 Renewal of Term Plan, (Cont'd.)

2.21.3 MMC Changes

(A) Change to Lower MMC

A Customer who changes to a lower revenue commitment may opt to implement the change in the middle of its bill cycle or may opt to make the change effective on the first day of the next bill cycle. If a Customer opts to implement the change in the middle of its billing cycle, a shortfall under-utilization charge applies for the unmet MMC for that billing cycle, if applicable.

(B) Change MMC to MAC

A Customer may change from a MMC to a MAC at any time during the billing cycle. The MMC will end and no under-utilization charge applies. A term plan must be signed by the Customer with new begin/end dates. The MAC will start on the date requested by the Customer.

2.21.4 Start Date and End Date

(A) MAC

Achievement of the MAC is calculated on the Customer's yearly Service Acceptance Date anniversary or end date of the term agreement commitment

(B) MMC

MMC is calculated at the end of the Customer's monthly billing cycle.

(C) Term Plan Agreement

When the Customer changes the billing cycle dates in the middle of a term plan agreement, the term begin and end dates will not change. The accumulated monies towards the MAC charges, if any, will be based on the begin and end date of the term without regard to the billing cycle.

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (CONT'D.)

3.4 Calculation of Distance

Usage charges for mileage sensitive services vary based on the type of service subscribed to by the Customer. For services utilizing switched access, mileage measurements for rate schedules are based on the distance in airline miles between rate centers associated with the originating and terminating stations. For services utilizing dedicated access, mileage measurements for rate schedules are based on the distance in airline miles between the AT&T Long Distance East network access point associated with the station utilizing Dedicated Access Origination/Termination and the rate center associated with the called/calling station.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by Telcordia, the following manner:

Step 1: Obtain the "V" and "H" coordinates for the serving wire center or network access point of the Customer's location and the called/calling station.

Step 2: Obtain the difference between the "V" coordinates. Obtain the difference between the "H" coordinates.

Step 3: Square the differences obtained in Step 2.

Step 4: Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5: Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6: Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers of the call.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (CONT'D.)

3.5 Call Timing

3.5.1 Long distance usage charges are based on the actual usage of the Company's network.

3.5.2 Chargeable time ends when the calling service point terminates, thereby releasing the network connection. If the called party hangs up but the calling number does not, chargeable time ends when the network connection is released by signal from the called party location or by automatic timing equipment in the telephone network.

3.5.3 Unless otherwise specified in this tariff, the minimum call duration for billing purposes is one (1) minute.

3.5.4 Unless otherwise specified in this tariff, usage is measured and rounded in one minute increments for billing purposes.

SECTION 7 – GRANDFATHERED SERVICES

7.1 SNET Business Flat Rate Plan*

7.1.1 General

The SNET Business Flat Rate Plan is an Optional Calling Plan (OCP) offered only to business customers. This OCP is one-second rated after an eighteen-second minimum service usage, utilizing Switched or Dedicated Access lines. Access is not included in billing, and must be provided under the terms and conditions set forth in the appropriate sections of the Company's Tariffs.

7.1.2 Regulations

- (A) SNET Business Flat Rate Plan customers can have multi location accounts that have the same account-billing name grouped together. Accounts that are added after the initial installation inherit the start date of the first account.
- (B) SNET Business Flat Rate Plan customers will be required to select a Minimum Monthly Commitment (MMC) without signing a term commitment or a Minimum Annual Commitment (MAC) which requires a term commitment. A customer participating in the Business Flat Rate Plan commits to spending a predetermined dollar volume, either annually in the case of a MAC or monthly in the case of a MMC.
- (C) SNET Business Flat Rate Plan customers can aggregate usage totals from inbound and outbound service usage, Calling Card usage and multiple Billed Telephone Numbers (BTN) when they are identified under a single Master Account Number, to meet either the MMC or MAC.

* - *Grandfathered to existing Customers at existing locations.*

SECTION 7 – GRANDFATHERED SERVICES, (CONT'D.)

7.1 SNET Business Flat Rate Plan*, (Cont'd.)

7.1.2 Regulations, (cont'd.)

- (D) Any commitment (MMC or MAC) shortfall will be applied to the Primary Billed Telephone Number of the Master Account Number.
- (E) Customers subscribing to a MMC will be given a two (2) month grace period where there will be no shortfall penalty assessed. If a customer subscribes to a MMC on any date other than the first day of the billing cycle, the partial first month is counted as a full month when determining the length of the no penalty period.
- (F) Customers subscribing to a MAC can upgrade without penalty to a longer term and maintain the same start date of the existing plan or, to a higher MAC and maintain the same start and end date of the existing plan.

7.1.3 Minimum Period

There is a one (1) month minimum for the SNET Business Flat Rate Plan when a customer commits to a MMC. There is a twelve (12) month minimum for the SNET Business Flat Rate Plan when a customer commits to a MAC.

** - Grandfathered to existing Customers at existing locations.*
